SUMMARY

Aspiring Data science with hands-on experience in data analysis, SQL, Python, Excel, and Power BI through internships and academic projects. Skilled in data cleaning, EDA, dashboard development, and identifying trends to generate actionable business insights.

TECHNICAL SKILLS

Programming Languages: Python, SQL

Data Analysis: Data Cleaning, Data Processing, Exploratory Data Analysis (EDA), Statistical Analysis

Data Visualization: Power BI, Matplotlib, Seaborn, Dashboard Development

Machine Learning: Predictive Modeling, Regression

Libraries & Tools: Pandas, NumPy, Jupyter Notebook, Spyder, Excel (Spreadsheets)

Soft Skills: Analytical Thinking, Problem Solving, Communication, Teamwork

EDUCATION

Bachelor of Technology in Information Technology (Pursuing)

2027

BV Raju Institute of Technology

INTERNSHIP EXPERIENCE

Python Programming Intern

Vaults of Code Organization (*Remote*)

Developed Python-based applications using core concepts such as lists, dictionaries, functions, and file handling. Implemented logical solutions for task automation and data management while improving programming and problem-solving skills.

Data Analytics Intern

Oasis Infobyte Organization (*Remote*)

Performed data cleaning, preprocessing, and exploratory data analysis (EDA) on datasets using Python. Created data visualizations to identify trends and patterns. Worked with Excel and Python to analyze structured data and generate analytical insights for decision-making.

PROJECTS

Hospital Emergency Department Waiting Time Prediction | *Python, SQL, Pandas, NumPy, Scikit-learn*

- * Analyzed hospital operational data to identify factors influencing emergency department patient waiting time.
- * Performed data cleaning, preprocessing, EDA, and feature engineering using Python, Pandas, NumPy, and SQL.
- * Built and evaluated Random Forest, XGBoost, and CatBoost regression models to predict patient waiting time.

Cryptocurrency Market Analysis | *Python, Machine Learning, NLP*

- * Analyzed cryptocurrency market data to identify price trends, market patterns, and factors influencing cryptocurrency performance using Python and exploratory data analysis.
- * Applied data preprocessing, feature engineering, and machine learning techniques to analyze market trends and generate data-driven insights.
- * Used NLP techniques to analyze cryptocurrency-related news and sentiment, identifying relationships between market sentiment and cryptocurrency price movements.

Uber Ride Analytics | *Python, SQL, Power BI, Excel*

- * Analyzed ride booking data to evaluate booking performance, cancellation behavior, and operational trends.
- * Applied Python and SQL for data cleaning, validation, EDA, and analysis of booking and cancellation patterns.
- * Built an interactive Power BI dashboard using KPIs, DAX, and visualizations to monitor ride performance and identify operational insights.

CERTIFICATIONS

360DigiTMG: Python, Power BI, MySQL

HackerRank: Python (Basic), SQL (Basic), Java (Basic)

EF SET: English Proficiency Certification

NPTEL: Soft Skills Certification
